NEW TRUCK - NEW OPPORTUNITIES

As reported elsewhere in this issue, we now possess the facilities of a self-powered vehicle. Before long, the truck will be equipped with a ten meter mobile station and other gear for operation on other bands, enabling us to tie in with any CD communications group in the Delaware Valley area as well as certain local police units. Since the truck does not require a prime mover as did the trailer, it will no longer be necessary to impose on one person every time the mobile units is to be used. While the time and effort required to hitch up the trailer to a truck and load all the miscellaneous equipment may not have been considered an imposition by Spence, it necessarily resulted in limited use of our "movable communications center". Since this restriction no longer exists, we should try to have the truck appear in as many civic events as possible. There are several ways in which we can benefit from frequent use of the truck. One of the most important is that operator training and familiarity with the equipment can be accomplished easily, resulting in a much larger reservoir of experience control center operators than we have been able to maintain in the past. Frequent use of the truck and radio equipment will also reveal possible sources of breakdown before actual failure occurs, enabling us to insure a high order of reliability. The appearance of the truck at numerous public functions will publicize ham radio and Phil-Mont on a local basis where it will do the most good. And finally, operating the truck and its equipment will be a heck of a lot of fun. Everybody can take part. Whether or not you do depends only on yourself. Speak up and join the fun!

W3QZO

THE LATEST SCOOP: ED just received a call from the new publisher - you know this new feller is going to be a hard one to reckon with. W3IW has been threatened with moving the QTH so a fast switch was made a few days back. Now the word is really going to get out on ED's fancy spelling. Since he started in on this typer a few years back Webster hasn't been able to keep up with the new coinages. For your info we now have W3WNC & the better half Anne doing the honors on getting these writings translated into something you can read. Anne will handle the typing load & Hy will start the presses rolling at their new QTH over in Broccoli. Bob is not due to move out for a bit so he is still a ready hand as always. --- The Hoover Vacuum Sweeper Committee came up with a new name on cw - it was converted to HOOPER COMMWI the first go around, and 5303F COMMWI the second time. The brass pounder was reported to be using his left foot for additional practice. Of course you know it takes two to make a team in this case. --- Bradley Algeo Jr. W3EM replaces C. (Jim) Spencer W3QQH as Eastern Area Radio Officer Jr. Deputy. Jim is not backing out - he has a new job the title of which we will print as soon as he puts it in writing. We don't dare take much scoop over the phone these days. Seems the phone lately has had a translator in the line, someplace. --- Best wishes and the best to W3BYB & his boss - they had a brand new baby girl of late - no pertinent details. --- Morry W3CSS recently with the club has been doing a bang up job in rounding up prizes. He was the first to report answers from his letters. W3CUB (the club grandfather) also says responses have been good - more on that when we have better scoop. --- W3WNC did a whopping job at the auction last month. Merchandise the like of which we have never seen, turned up & was neatly dispatched under Hy's guidance. The auction has become a permanent fixture on the annual roster. This last one was a huge success. Many thanks for the job Hy - it is appreciated. And if W3DFG doesn't send a card over with the \$\$\$ dope his name is going to appear on the TPCSSOA list even tho he has been a good contributor. --- Speaking of TPCSSOA we were more than pleased with the response from the bit about the society that was listed last month. "e received over double the quantity of cards as a result of the music we played. It was all intended in fun and fortunately was taken so by most fellows. However there were a few who were not so responsive & took it the wrong way. Since we receive negations for what ever we print ED has long ago found that the paper must please the multitude & this we have fortunately managed to do. ED keeps himself amused with a little incident which many EDs have experienced- that of making a prevocative remark directed at nobody but finding 3 readers thinking they individually were the targets & very indignantly writing in and saying so. Andy W3NL has been through this one we know. So in the spirit with which it was intended we reprint the more recent members of

To give you an insight on what the mail brought --- W3CDY writes Two suggestions which ought to be adopted forthwith 1. Any member wishing to say something during a meeting be required to rise and be recognized, (which is usually done) then remain standing until finished. The big point being that there be no speaking from your seat and less verbal activity when the business meeting is in progress on the part of those not listening but who should be. 2. When ARRL elections take place, may I suggest that we have someone find out all he can about the candidates and report same to the members to help in voting more intelligently. --- W3DRJ says don't forget to mention that the film Every Single Minute was shown also to Delaware-Lehigh Amateur Radio Club in Easton, Carbonale

Amateur Radio Club, Lehighton Pa. & also the Lancaster group. EDs note here-
"Jonesey is reported to have shown the film to something on the order of (11) clubs. Put that one in your pipe & smoke it". "Who is the runner up". W3HYU says he desperately needs a typewriter in order to continue with his part on the Wobbly Hobby-his old junker conked & he doesn't have the \$\$\$ to get another - Many of the fellows would like to see more Wobbly Hobby but nobody is voting a \$ 25 typer for club use. W3ADF donated the one we have - is there another around? Al is willing to keep the pot boiling but nobody backs him up. Frenchy can't carry it all. It's much easier if the job is split. You will recall Al is the one who thot up the page & handled it all alone for a couple of years. --- W3IV says Donn Baker & his xyl live up in the western interior of Alaska near the town of Kaltag. Bob talked to him when he (KL7ASQ) sat down on Chan. 1 and called CQ. They had a 1/2 hour contact. Donn expects a hard winter - they already have a foot of snow. The mail gets to him by dog sled. He works for the C.A.A. & mans a repeater station way out in the wilds. We can't figure out what working does for him. The rest of us work for cash. Donn must bury his in the snow to preserve it hi. Or maybe he squanders it all buying summer dresses for the boss. --- From W3NIP to fellow members of the Post Card Saving Society of America - I will pay 1¢ for each uncanceled Phil-Mont post card given to me. I have developed a sure fire method of removing the mimeographed over print. Maybe I can interest the Blurbs in buying them back from me - Printing and all - for just 3¢ a real bargain. W3OEC says - what progress is being made about the Mobile Conelrad problem by club members? A discussion or talk by the informed may be of great interest, and help to other members. --- Sam complains the cards don't have enuf room on them for writing. Also he reports an item in a recent Phila. paper "The Post Card Collectors Society is having a convention at the Ben Franklin Hotel OCT. 13 & 14". QRZ. Another point he makes- For those who are about to build new rigs for a 12v car, the 6883 tube should be of interest. This bottle is exact replacement for the 6146 except that its heater is rated at 12.6/0.25 amp. Same price as 6146. Another: There is plenty of 6 M mobile activity from "Mobile Sixers" on 5.550. Jim Barber W3FQI who has drawn Blurbs covers is Pixy. The channel is monitored a good part of the day - They will gladly assist in tests with any of our gang who might be interested. They want to cooperate with us on a joint monitoring scheme - seems worth while investigating. They have about 10 mobiles & all use low power. W3SAI says he is much in favor of getting the Treasurer an assistant. He also suggests the same for the Secretary calling one the Executive Secretary & the other the Corresponding Secretary. He suggests two listings on the ballot for each. A point of comment - it looks as if the second office in each case is to be appointive by the one elected however the winner in each case has a dandy slate to pick his aid from. (From is a preposition h.). W3SRD has real news - "W3YFV is the only male student at Beaver College where he is taking photography. Another Phil-Mont first! The consensus of opinion on the freq. is that Chas. is harmless among all those gals." W3VSV writes in and wants to see more talks on radio.---W3VVS says -I need 160 - 40 - 20 meter coils for that expensive National FB - 7 receiver I bought at the auction - who has 'em? His tubular 6m "J" is installed but W3HQJ says the sig at his place on 50.7 is pretty weak. Anyone else on Chan. 4? 160 is picking up with arrival of the cooler weather. He worked up state NY FB. W3WNC sends in some scoop that is "Confidential" at this time. --- W3WNC suggests we compile a list of all mobile clubs & their frequencies as a supplement that can be removed from the Blurbs for filing in the car. --- W3SAA says "Hi Geo. please remove my call from TPCSSOA, HI. Since I won't be able to turn mine in tomorrow at the meeting - I thought I had better mail 'em. --- Well were you have it fellows, we received 16 cards this month an increase of 50%. You can see why ED

must over look comments from a few. Every one of the cards had a constructive or humorous comment. W3SAA even took the trouble to mail 'em back which is what we least expected. Needless to say ED had a good chuckle when he opened up the envelope and out fell 3 cards. We don't care how we get them just as long as they don't go in the vertical file. The end justifies the means in this case - we will print the "Stamplickers Association" every once in a while just to keep you from falling asleep when the "rag" arrives in the mail. ---

THE COM-TRUCK STORY

A few meetings back W3NIP mentioned the announcement of a sale of a Bookmobile by one of the local Townships. The announcement in the local paper asked for sealed bids. Nobody had seen the vehicle so wasting no time we called one of our influential members W3CCB who arranged a viewing of the truck before the meeting was over. The quickly formed committee(W3CCB, W3NIP, W3PXY, W3DOU, W3QQH, W3TOZ did we leave out someone?) made a recommendation to enter a bid. The truck a 1948 International Harvester (walk in) had 5400 miles on it & looked like new. The boys were somewhat enthusiastic about the possibilities of the truck but almost everyone didn't give it much hope. The bid we realized was low so ED decided to exercise a little promotion to see if we could interest them, in the light of CD, and general emergency activities. He made up a Brochure in a hurry which turned out to be a loose leaf leatherette binder with plastic windows inside containing various documents and pictures of the club along with QST'S article on the flood. ED & W3TOZ teamed up to approach the Township Board of Commissioners by first getting the local commissioner interested & later making a date with the President of the board to show him the Club film "Every Single Minute". Being actively interested in CD activities he was favorably impressed to the extent of notifying the local CD group of his ideas and also arranging a showing of the film to all the Board of Commissioners. The presentation of the film was received favorably & when ED later called to inquire as to the decision of the board he was informed the Board had approved the opening of negotiations between the CD & Phil-Mont's representatives. Meanwhile the sealed bid opening date came and went with PMRC's bid as the lowest with about 8 bids ranging up to about 3 times as much as we offered. The board felt they could receive much more benefit from it as a public service vehicle under jurisdiction of CD & our group. The next mail returned our bid saying all bids had been rejected. About 7 weeks later with several more showings of the film & much bush beating on the part of the Springfield gang we held a meeting with the CD officials who presented their interest & asked a good many questions. The meeting wound up favorably with the subject "under advisement". It wasn't too long when ED received a call to come around and make the detail negotiations with Ken Bierly the Director of the CD Council. Well you know the rest - the truck showed up at the mid month and a bunch of pleased fellers looked it over. It looked as if it came right out of the show room. A committee headed by W3QQH is being formed to take care of all the details of converting it into a mobile communications center. There are a number of jobs to be done- Finances, Insurance, Construction, Maintenance, Drivers, Scheduling, and Springfield Coordinator which need volunteers. The driver situation has been organized on a tentative basis:

<u>Drivers</u>		<u>Alternate Drivers</u>
1.	W3CCB	W3PXY
2.	W3QQH	W3VVS
3.	W3NIP	W3KDO
4.	W3YJM	W3DSG
5.	W3TOZ	W3IRS
6.	W3GPX	W3OEC

W3CCB & W3QQH will check out the fellows since driving a truck is not the same as

your own bus. The transmission is different, double clutching etc. The fellows driving must have adequate insurance on himself. The list above were chosen as responsible individuals who are strategically located. This list is only tentative depending on the individual insurance situation & the approval of the Chairman. Nobody else is permitted to run the vehicle, without special approval. If you have been out to one of the recent midmonth meetings you know why- we have taken on a responsibility which must be treated with gravity.---Some of the boys have been helping us review other publications and have been giving us material that would look good in print. This is a real assist fellers-ED piles up a heap of material a foot high on his desk every month to be reviewed - we only use about 2 to 3 percent of the material so you can see what a mess of looking must be done. We want to pick the brains of other publications which are pertinent to our interest and any assist in that direction is appreciated. If you see an article you think the fellers might like-hand or mail to ED

ISN'T IT FUNNY?

When the other fellow takes a long time to do something, he's slow
But when I take a long time to do something, I'm thorough.
When the other fellow doesn't do it, he's too lazy
But when I don't do it, I'm too busy.
When the other fellow goes ahead and does something without being told,
he's overstepping his bounds
But when I go ahead and do something without being told, that's initiative.
When the other fellow states his side of the question strongly, he's bullheaded
But when I state my side of the question strongly, I'm firm.
When the other fellow overlooks a few of the rules of etiquette, he's rude
But when I skip a few of the rules, I'M original.
When the other fellow gets ahead, he sure had the lucky breaks
But when I manage to get ahead, MAN! Hard work did that.

Credit: Springfield Ohia Q-5, August issue.-We got a real charge out of the above. ED would love to put some names alongside of each line but it would only lead to bloodshed hi. --- We have heard a lot of comment on the use of call signs the following seems appropriate:

USE OF CALL SIGNS

Every amateur should be familiar with the proper use of call signs, yet it is impossible to listen on any of the bands without hearing the rules broken. A close study of the following FCC regulations should clear up any questions on this, and may prevent receiving a ticket.

#12.82-Transmissions of Call Signs; (a)

(1) The operator of an amateur station shall transmit the call signs of the station or stations (or may transmit the generally accepted identification of the network), being called or communicated with, or shall identify appropriately any other purpose of a transmission, followed by the authorized call sign of the station transmitting:

(1) At the beginning and end of each single transmission, or;

(11) At the beginning and end of a series of transmissions between stations having established communications, each transmission of which is of less than three

minutes duration-(the identification at the end of such a series may be omitted when the duration of the series is less than three minutes), and

(111) At least once every ten minutes or as soon there after as possible during a series of transmissions between stations having established communications, and,

(112) At least once every ten minutes during any single transmission of more than ten minutes duration."

THE IMPORTANT POINTS TO REMEMBER ARE:

Identify your station every time you put a carrier on the air.

When calling into a net, either use the net identification, such as IFN, or the call of the NCS.

To call into a round table it is not necessary to call all stations, one will be enough.

In handling traffic, or working break-in, it is only necessary to identify your station once every ten minutes after communication has been established.

When breaking, always give YOUR call.

ALWAYS give YOUR call LAST.

Mobiles should give their approximate location each time.

"12.159-Unidentified communications. No licensed radio operator shall transmit unidentified radio communications or signals.

12.160-Interference. No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal." An amateur is known by his conduct on the air. Let's make Hoosiers noted for their courtesy and GOOD OPERATIONS. Lew, W9NTA, SCM, Indiana.

Operating New, QST, March, 1956: "From the Oklahoma section report comes this brief question and answer quiz-

Q-Why do amateurs use we instead of I?

A-Subconscious admission they are henpecked or someone else built their rig.

Q-Why do amateurs use Q-signals on phone when they never use c.w.?

A-To make others think they are hot CW ops.

Q-Why do amateurs tune up on an occupied frequency?

A-An inferiority complex.

Q-Why do they interfere intentionally with an organized net?

A-To show their rugged individualism anonymously.

From the Washington, DC AUTOCALL of July, 1956-"Every amateur should seriously ask himself if he is contributing all he can to the art of actual communications.

Certainly frequencies are not maintained for the individual who does nothing but get on the air and yak. It's only when the amateur becomes a part of a communications system that he contributes to those elements which give him the privilege of using the frequency.....Fortunately we have some excellent nets on the amateur band which are a joy to listen to. We also have some nets. An amateur will derive as much pleasure listening to a real snappy, sharp, well disciplined net as he does from looking at a Marilyn Monroe calendar (well maybe, about as much).

The fellows who wrote the above articles had no way of knowing they were writing about a club in the Philadelphia Area H1. The shoe fits you might say. --- A few constructive thoughts-W3NQV has offered & was accepted to send out cards to fellers who visit the area. "Trackless Travers" is going to write up something appropriate & the Publisheng Dept. is going to print. Joe receives notice of as

many as ten a day at certain seasons of the year. A l'il more of getting the good word around.--- W3SGR you will recall worked up the card which said "You were heard on 29.493 mcs by the PMRC etc" Carl did this at his own expense & sent a pile of them out. One year we swamped the Old Timers Nite by placing one at each table setting at the Stacy Trent in Trenton. We figure the idea was hot but the timing was wrong. Now is the time to reactivate it Carl. We can work up something on the post card machine according to any new ideas you may have. There are many fellows on the freq. who need to hear about PMRC. --- The above chit chat brings to mind and idea of working up a big splash at Old Timers nite this year with cards or letter or one of Jays choice bits run off on the ole press speshul fer the occasion. How about loosening up a few screws Jay, & dream up a corker for that nite. Fact is we might use the front cover of this rag for that month which could be tied in appropriately---Don't forget to send in your license plate application before Dec. 31st this year. W3QQH will have the forms available at the meeting. --- The election committee got off to a good start at a early date and really lined up a ~~mess~~ group of fine fellows. ED had the pleasure of being a member of the committee this year & last and noticed a definite upturn in interest to run. Previously we started out with a formidable slate of every one we could think of who felt would do a good job, taking into account all proposals from the membership. This amounted to a real gang of fellows last year but by the time all the calls had been made it dropped down considerably. Not so this year - the boys were right eager to run. This is a significant change for the better. The committee approved last years rules and added:

NOMINATING COMMITTEE RULES (tentative)

1. The nominating committee shall consist of 7 members who shall be appointed by the president. The 7 members shall be chosen on the basis of the representation of all factional interests within the club.
2. The chairman of the nominating committee shall serve on the committee the following year, If this is not possible another member of the committee shall be so appointed by the president.
3. Nominating committee members are permitted to run for office but only upon petition from the membership. The committee cannot nominate themselves.
4. All offices are to have two or more nominees. Every effort shall be made to see that this rule is fulfilled.
5. Nominations are to be announced at the November regular meeting.
6. Nominations will be accepted from the floor at the November regular meeting after publication of the slate of nominees presented by the committee.
7. Nominations after the November regular meeting must be made by written petition signed by at least 6 members.
8. All nominations are closed by the 15th of November.
9. A space shall be provided on the ballot for a write in vote.
10. Nominees for each office shall be listed alphabetically by name on the ballot and on the published list.
11. No information on nominees is to be given out prior to the November meeting.
12. Only members who have accepted nomination will be announced. All others are to be kept confidential.
13. Only members who have previously indicated their willingness to run can be nominated for office.

14. Absentee balloting is acceptable only by a signed statement of the absent member.
15. The nominees names for President and Vice President shall be grouped together on the nomination slate. Two ballots will be voted. The first ballot shall elect the President. The remaining names on the first ballot shall be the nominees for Vice President. A second ballot shall be cast for the Vice President and also to include the nominations for Secretary and Treasurer.
16. The Officer elected as Executive Secretary shall appoint one assistant to be known as Corresponding Secretary. The Corresponding Secretary office to have Executive Committee status.
17. The Officer elected as Executive Treasurer shall appoint one assistant to be known as the Assistant Treasurer. The Assistant Treasurer office to have Executive Committee status.

In the mail bag - Dick (W3UMK) reports W3VSU lent him his car & rig so that he could help W3BGP with a Boy Scout hike in the French Creek Park a few weeks ago; there were 8 check points along the 14 mile route. From the fire tower Dick worked W3YJM, W3UVL, W3QZO, and W3IW. Hy is giving Dick an assist on repairing a Pioneer dynamotor for his rig. From W3NL, Dear ED, a report to you on your film which I mailed to you this morning. Our Hamfest was excellent and we had a paid attendance of around 600. The extra women & children should bring it up to around 800 or more. Your club film was shown at the first part of our main program prior to giving out the prizes so we had the full audience for it. I was unable to see it this time because I was the "program manager". During the course of the film I made a trip from the front to the back to observe just how well the film was being received because showing a film at any of the local hamfest is an innovation and we wanted something to guide us in the future. I want you to know that with the exception of a couple of groups of three or four, the entire audience of 800 or so was giving the film its undivided attention. They enjoyed it immensely and my tape recording of the entire program will show that it got a lot of applause at its conclusion. I would not hesitate to recommend it to other Hamfests as the main part of the program. End of quote. --- Well - sure as you are reading this Bill, W3VXN, did it again. And in case you didn't read between the lines - we never would have had the Com-Truck if it hadn't been for the film. Its going to be a long time before this club can express its gratitude in the magnitude worthy of his effort. That bit of selflessness makes us forget all the little discontinuities we hear on the "dial". --- We have not scratched the surface of real benefits from the film since it has had no formal "advertising" as such, We have a partial write up for W2NSD which ought to give it another boost. Every bit of interest generated so far has been by word of mouth & the Blurbs. Soon as you are able Bill to write down the mechanics of making the film, we will wrap it all up into an article Wayne can publish. He has taken the initiative to see it gets a big splash. We are several months late in getting it to him. Our only alibi is - "it doesn't take much to get the wagon broken down". --- One last bit & we will let you go. --- ED could use an assist in compiling data & articles for the Blurbs. W3QZO has offered - we are going to buzz some of the local boys -- 'sall for now, CU next month.

VISITORS AT THE LAST MEETING: W3IZW, W3CEV, W3OPK, W3UMD, W3ZLX, W3BGP, W3WUX,
W3FSN, W3ISE, W3GBN, W3A ZE, W3IOU, K6DEF/3
W3YDH, Warren Keer.
